

DEPARTMENT OF LABOUR

Government Notice. R: 1591

4 October 1996

Vessels under Pressure Regulations, 1996

The Minister of Labour has, under section 43 of the Occupational Health and Safety Act, 1993 (Act 85 of 1993), after consultation with the Advisory Council for Occupational Health and Safety, made the regulation in the Schedule

SCHEDULE

Definitions

1. In these regulations “the Act” means the Occupational Health and Safety Act, 1993 (Act No. 85 of 1993), and any expression to which a meaning has been assigned in the Act shall have the meaning so assigned and, unless the context indicates otherwise –

“boiler” means any apparatus to convert continuously any liquid into steam, vapour or gas at a pressure higher than that due to the atmosphere and where the heat is derived from a source other than steam or the ambient temperature of the atmosphere, and includes any superheater or economiser which is an integral part of a boiler or is separately fired therefrom, but does not include such an apparatus, superheater or economiser in which the product of the design pressure in pascal and the volume in cubic metres is less than the figure 15 000;

“design pressure” means the pressure used in the design formulae to determine the dimensions of the component parts of a vessel under pressure;

“flammable liquid” means any liquid that produces a vapour that forms an explosive mixture with air, and includes any liquid with a closed-cup flash-point of less than 55°C;

“gas fuel” means liquefied petroleum gas, any coal produced gas or natural gas;

“gas fuel system” means an assembly of tubes, pipes or similar ducts, fittings and valves for the process and conveyance of a gas fuel, excluding a boiler, pressure vessel or portable gas container connected to the system;

“gauge pressure” means the pressure in excess of that due to the atmospheric pressure;

“hand-held fire extinguisher” means a rechargeable container which has a fire extinguishing substance that is expelled by the action of internal pressure for the purposes of extinguishing a fire;

“hazardous chemical substance” means a substance defined as such in Regulation 1 of the Regulations for Hazardous Chemical Substances published under Government Notice No. R. 1179 of 25 August 1995;

“maximum permissible operating pressure” means the maximum gauge pressure at which a vessel under pressure may be operated;

“modification” means any change from the original design criterion of the vessel under pressure and “modify” has a corresponding meaning;
“portable gas container” means any cylinder or other vessel of which the water capacity by volume is at least 0,5 litres, but does not exceed 1 200 litres and which is intended for the storage and conveyance of compressed, liquefied or dissolved gases;

“pressure vessel” means any vessel of which the interior or jacket is under pressure or in which a cushion of gas or vapour can form above the liquid at a pressure in excess of that of the atmosphere, including a diving bell, but does not include –

(a) a boiler;

(b) a vessel in which the pressure is exerted by a liquid the temperature of which does not exceed the boiling point of the liquid at atmospheric pressure and in which a cushion of gas or vapour cannot form above the liquid;

(c) the working cylinders or chambers of a steam, heat or air engine;

(d) a vessel under pressure which forms an integral operating part of a motor vehicle or locomotive running on railway lines;

(e) a portable gas container;

(f) a pressurised system;

(g) a vessel of which the product of the design pressure in pascal and the capacity in cubic metres is less than the figure 15 000;

(h) a vessel of which the design pressure is less than 40 000 pascal gauge pressure;

(i) a vessel with a nominal internal diameter of less than 150mm; or

(j) a hand-held fire extinguisher;

“pressurised system” means an assembly of vessels under pressure and includes connections by pipes or similar ducts, fittings and valves which operate under gauge pressure equal to or greater than 40 000 pascal for the process and conveyance of a flammable liquid, hazardous chemical substance, saturated steam or superheated steam;

“provincial director” means the provincial director as contemplated in regulation 1 of the General Administrative Regulations published under Government Notice No. R. 1449 of 6 September 1996 as amended;

“repair” means a repair to any part subjected to pressure from a vessel under pressure that requires the application of heat welding, or the replacement of more than 20% of expanded tubes in a boiler or pressure vessel at any one time and “repairing” has a corresponding meaning;

“SABS 1475” means the Standard Specification for the Production of Reconditioned Fire-fighting Equipment, SABS 1475, Part 1: Portable Fire Extinguishers, published by the South African Bureau of Standards (SABS);

“SABS 0227” means the Code of Practice for The Evaluation of the Technical Competence of Inspection Authorities for the Certification of Vessels under Pressure, SABS 0227, published by the South African Bureau of Standards (SABS); and

“vessels under pressure” means a vessel which operates under pressure and includes a boiler, pressure vessel, pressurised system or portable gas container.

Scope of Application

2. These regulations shall apply to all users of vessels under pressure: Provided that regulation 3 shall not apply to a boiler, pressure vessel or portable gas container in use prior to 23 October, 1992, and which was designed constructed and manufactured in accordance with regulations in force at that time.

Design, construction and manufacture

3. (1) Subject to the provisions of subregulation (2), no user shall use, require or permit the use of any vessel under pressure unless-

(a) it has been designed and constructed in accordance with a health and safety standard incorporated into these regulations in terms of section 44 of the Act;

(b) it has been manufactured under the supervision of an approved inspection authority as contemplated in regulation 17(1)(a) or any other inspection authority outside the Republic recognised by the chief inspector; and

(c) the user is in possession of a certificate of manufacture issued by the manufacturer in which it is certified that the boiler, pressure vessel or portable gas container has been designed, constructed and tested in every respect in accordance with the standard contemplated in subregulation (1)(a): Provided that such a certificate shall be countersigned by the approved inspection authority as evidence that the design of such a boiler, pressure vessel or portable gas container has been verified and that it has been constructed and tested under their supervision in accordance with the said standard.

(2) The certificate required by subregulation (1)(c) in the case of a pressure vessel or portable gas container may refer to more than one pressure vessel or portable gas container: Provided that each pressure vessel or portable gas container has the same design pressure and dimensions, and that the product of the design pressure in Pascals and the volume in cubic meters of that vessel does not exceed the figure 500 000.

Manufacturer's data plate

4. (1) Every user of a boiler or pressure vessel shall cause a manufacturer's plate with the following minimum particulars to be securely fixed in a conspicuous place to the shell of every such a boiler or pressure vessel:

- (a) Name of manufacturer;
- (b) country or origin;
- (c) year of manufacture;
- (d) manufacturer's serial number;
- (e) name, number and date of the standard of design;
- (f) design gauge pressure in Pascals; (design pressure)
- (g) maximum permissible operating pressure in Pascals;
- (h) operating temperature;
- (i) capacity in cubic meters; and
- (j) mark of an approved inspection authority.

(2) No person shall remove such a manufacturer's plate or willfully damage or alter the particulars stamped thereon, except as provided in regulation 16(4).

Registration of a boiler

5. (1) No user shall commission or use a boiler unless the user is in possession of a certificate of registration issued in terms of subregulation (3) for that boiler: Provided that a boiler registered with the Department prior to the 23 October 1992 shall be deemed to be registered in terms of this regulation: Provided further that a boiler registered after 23 October, 1992 shall on change of ownership be required to be reregistered.

(2) Any user who wishes to use a boiler shall apply to the provincial director for registration of that boiler on a form similar to Annexure 1, prior to such use: Provided that this subregulation shall not apply in respect of the re-erection of a boiler on the same premises.

(3) On receipt of an application contemplated in subregulation (2), the provincial director shall forward such an application to an inspector who may issue a certificate of registration in the form of Part C of Annexure 1 in respect of that boiler, subject to such conditions as may be specified on the certificate.

(4) A user of a boiler for which a certificate of registration has been issued in terms of subregulation (3) or a certificate issued by the Department prior to the 23 October 1992, shall cause the certificate of registration to be made available for inspection by an inspector or on request by an approved inspection authority or a competent person.

(5) The user shall within seven days after the discovery that the certificate of registration has been lost, defaced or destroyed, or any such an occurrence, apply to the provincial director in the form similar to Part A of Annexure 1 for the issue of a duplicate certificate, and affix R100 in the form of uncanceled revenue stamps to such an application. On receipt of such application the provincial director shall submit the application to an inspector who shall issue the duplicate certificate on satisfaction that the original certificate was lost, defaced or destroyed.

(6) An inspector may at any time amend, suspend or cancel a certificate of registration issued in terms of subregulation (3).

(7) Any user of a boiler shall forthwith notify the provincial director in writing when -

(a) such boiler is no longer in use;

(b) the right of control over the use of the boiler is transferred by the user to any other user, in which case the user shall also furnish the provincial director with the name and address of such new user; or

(c) the user moves the boiler to premises other than the premises reflected on its certificate of registration.

(8) A certificate of registration issued in terms of subregulation (3) shall lapse--

(a) when it is cancelled by an inspector;

(b) upon the transfer of the right of control over the use of the boiler to another user; or

(c) when a boiler is removed from the premises reflected on its certificate of registration.

Appurtenances

6. (1) No user shall require or permit a vessel under pressure to be used unless it is provided with all the appurtenances as required by the health and safety standard used in the design, construction and manufacture of such a vessel under pressure: Provided that alternative appurtenances other than those required by the standard shall only be fitted with the written approval of the approved inspection authority.

(2) In the absence of such a requirement in the health and safety standard used in the design, construction and manufacture of such a vessel under pressure, appurtenances shall be provided as required by the approved inspection authority and those appurtenances shall be so selected, arranged and installed as to be safe for the particular purpose for which the vessel under pressure is to be used.

(3) Every user of a boiler or pressure vessel shall ensure that the boiler or pressure vessel in use is fitted with at least one pressure gauge and the maximum permissible operating pressure shall be clearly marked with a red line on the dial of the pressure gauge.

(4) Every user of a boiler or pressure vessel shall ensure that the boiler or pressure vessel in use is fitted with at least one safety valve and such a safety valve shall be kept locked, sealed or otherwise rendered inaccessible to any unauthorized person: Provided that the number and capacity of the safety valve shall be to the requirements of the design standard for the boiler or pressure vessel as required under subregulation (2).

Automatic controls and indicators

7. Every user shall ensure that the automatic controls and indicators of a boiler, pressure vessel or pressurised system are arranged, installed, maintained and operated in accordance with the provisions of the health and safety standard used in the design and manufacture of the boiler, pressure vessel or pressurised system: Provided that in the absence of such provisions, where automatic controls and indicators are installed, they shall be selected, arranged and installed subject to the written approval of an approved inspection authority.

Access

8. The user shall cause every boiler, pressure vessel or pressurised system to be erected in such a manner that access to and exit from any chamber, flue, manhole, inspection opening, control or appurtenance is safe and unobstructed.

Door Interlocks

9. Any user of a pressure vessel or pressurised system shall cause every such vessel or system which for operational purposes is equipped with a removable or hinged door to be provided with an interlock or other effective means for preventing -

(a) a rise of pressure inside the pressure vessel or pressurised system before the removable or hinged door is in the fully closed and locked position; and

(b) the release of the removable or hinged door from the locked and closed position before the pressure inside the pressure vessel or pressurised system has been reduced to atmospheric pressure.

Portable gas containers

10. No user shall use or require or permit a portable gas container to be used, and no user shall fill, place in service, handle, modify, repair, inspect or test any portable gas container, other than in compliance with standards incorporated into these regulations in terms of section 44 of the Act.

Hand-held fire extinguishers

11. (1) No user shall use, require or permit the use of a hand held fire extinguisher unless designed, constructed, filled, recharged, reconditioned, modified, repaired, inspected or tested in accordance with a safety standard incorporated into these regulations in terms of section 44 of the Act.

(2) No person shall fill, recharge, recondition, modify, repair, inspect or test any hand held fire extinguisher unless a holder of a permit issued by the South African Bureau of Standards in terms of SABS 1475.

Gas fuel use, equipment and systems

12. (1) No person shall handle, store or distribute a gas fuel in any manner, including the filling of a container, other than in accordance with a health and safety standard incorporated into these regulations under section 44 of the Act.

(2) No person shall install a fixed appliance, equipment or system for gas fuel in any manner other than in accordance a health and safety standard incorporated into these regulations under section 44 of the Act.

(3) No person shall install a fixed appliance, equipment or system for fuel gas as contemplated in subregulation (2), unless such person is holder of a certificate of registration issued by an organisation approved by the chief inspector: Provided that subregulations (2) and (3) shall come into effect on 1 August 1997.

Inspection and test

13. (1) Any user of a boiler or pressure vessel shall cause, where reasonably practicable, such a boiler or pressure vessel, including the appurtenances and automatic controls and indicators, to be subjected to an internal and external inspection, and a hydraulic pressure test to 1.25 times the maximum permissible safe operating pressure as the case may be --

(a) by an approved inspection authority before commissioning after installation, re-erection or repairs;

(b) by a person appointed in writing by the user and who is competent to do such inspections and tests by virtue of their training, knowledge and

experience in the operation, maintenance, inspection and testing of a boiler or pressure vessel within 36 months from the date of the previous internal and external inspection and hydraulic pressure test: Provided that where a pressure vessel is not subjected to corrosion, the user may dispense with the internal inspection and hydraulic pressure test subject to the written approval of an approved inspection authority: Provided further that an inspector may require a specific boiler or pressure vessel to be inspected or tested more frequently or permit a specific boiler or pressure vessel to be inspected or tested less frequently:

Provided that no person shall perform internal and external inspections and hydraulic pressure tests contemplated in subregulation (1)(b) unless he or she is a holder of a certificate of registration issued by an organisation approved by the chief inspector: Provided further that this proviso shall come into effect 12 months after the publication of this regulation.

(2) Any user of a pressurised system shall, where practicable, cause such a pressurised system to be subjected to an inspection and hydraulic test, by an approved inspection authority before commissioning, after installation or re-erection.

(3) Any user of a gas fuel system shall, where reasonably practicable, cause the system to be subjected to an inspection and hydraulic test by a registered person in terms of regulation 12(3), before commissioning, after installation or re-erection.

(4) Where it is impracticable to use a liquid for the hydraulic pressure test contemplated in subregulation (1), (2) or (3), the test may, subject to the prior written approval of an approved inspection authority, be carried out with a non-flammable gas to a pressure of 1.1 times the maximum permissible operating pressure : Provided that, where reasonably practicable, the test must be preceded by an internal inspection and on such further conditions and precautionary measures as determined by the approved inspection authority.

(5) Where an inspection or test carried out in terms of subregulation (1), (2), (3) or (4) reveals any weakness or defect whereby the safety of persons may be endangered, the weakness or defect shall be reported immediately to the user by the person carrying out the inspection or test and the user shall forthwith cease the use of the boiler, pressure vessel or pressurised system until such weakness or defect has been rectified to the satisfaction of the approved inspection authority concerned or the person who carried out the inspection, as the case may be.

Record keeping

14. Any user of a vessel under pressure shall keep on his premises a record which shall be open for inspection by an inspector in which the results of inspections, tests, modifications and repairs shall be recorded, dated and signed by the competent person.

Maintenance

15. (1) No user shall use, cause or permit a vessel under pressure or gas fuel system, including all automatic controls, indicators and appurtenances, to

be used unless it is at all times maintained in a safe working condition and the efficiency thereof is proved by regular testing.

(2) No user shall use or cause or permit a vessel under pressure to be used unless it is kept clean and free from any:

(a) carbonised oil or other inflammable material which may ignite under working conditions;

(b) material which may cause corrosion; or

(c) material which is liable to chemical reaction which may cause an uncontrolled rise in pressure.

Modification and repair

16. (1) Any person who intends to modify or repair a boiler, pressure vessel or portable gas container shall cause such modification or repair to be carried out under the supervision of an approved inspection authority, as contemplated in regulation 17(1)(b).

(2) Any modifier or repairer carrying out any modification or repair, as contemplated in subregulation (1), shall issue a certificate in which the extent of the modification or repair is described and certify that such work is in accordance with a health and safety standard incorporated into these regulations: Provided that such certificate shall be countersigned by the approved inspection authority as evidence that the design of such modification or repair has been verified and that it has been modified or repaired and tested under their supervision in accordance with the said health and safety standard.

(3) Whenever it appears from an inspection or test that a boiler or pressure vessel cannot be used with safety at its maximum permissible operating pressure and the user declines to have the necessary renewals or repairs effected, the user shall ensure that:

(a) an approved inspection authority fixes a new reduced maximum permissible operating pressure; and

(b) that the boiler or pressure vessel is not used at a pressure higher than the new reduced pressure.

(4) The user shall cause the reduced maximum permissible operating pressure as calculated under subregulation (3)(a) to be marked on the manufacturer's plate on which the approved inspection authority shall also place its mark and no user shall thereafter require or permit such a boiler or pressure vessel to be used at a pressure higher than such a reduced pressure: Provided that in the case of a boiler the registration certificate together with a copy of the approved inspection authority's report shall be forwarded to the provincial director for correction.

Approved Inspection Authorities

17. (1) The chief inspector may approve any organisation that has been accredited in terms of:

(a) SABS 0227 Part 1 to perform the functions regarding the certification of new vessels under pressure, inspections and testing; or

(b) SABS 0227 Part 2 to perform the functions regarding the certification of modified or repaired vessels under pressure, inspections and testing, as an approved inspection authority.

(2) Application for approval for an organisation as contemplated in subregulation (1) must be accompanied by a valid certificate issued by the South African Bureau of Standards in terms of SABS 0227 Part 1 and Part 2.

(3) The chief inspector may at any time withdraw any approval of an approved inspection authority, subject to the provisions of section 35 of the Act.

Offences and Penalties

18. Any person who contravenes or fails to comply with the provisions of regulations 3.(1), 4, 5.(1), 5.(2), 5.(4), 5.(5), 5.(7), 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 or 16 shall be guilty of an offence and liable on conviction to a fine or to imprisonment for a period not exceeding twelve months and, in the case of a continuous offence, to an additional fine of R200 for each day on which the offence continues or to an additional imprisonment not exceeding one day for each day on which the offence continues: Provided that the period of such additional imprisonment shall not exceed 90 days.

Repeal of regulations and annexures

19. The following regulations, notices and annexures are hereby repealed:

(a) Notice of the incorporation of the safety standard published under Government Gazette Notice No. R 2357 dated 25 November, 1988;

(b) Vessels under Pressure regulations 1992, Annexure 1 and the schedule published under Government Notice No. R 2919, dated 23 October, 1992; and

(c) Correction notice published under Government Notice No R 78 dated 22 January, 1993.

Short Title

20. These regulations shall be called the Vessels under Pressure Regulations, 1996.

**Incorporation of health and safety standards
Vessels under Pressure Regulations**

Under section 44 of the Occupational Health and Safety Act, 1993 (Act No 85 of 1993), I, Tito Titus Mboweni, Minister of Labour, after consultation with the Advisory Council for Occupational Health and Safety, hereby incorporate in the Vessels under Pressure Regulations, 1996, the health and safety standards specified in the Schedule.

T.T. Mboweni
Minister of Labour

SABS 1539 Appliances operating on liquefied petroleum gas - Portable and mobile appliances - Safety aspects.

**NOTICE OF EXEMPTION IN TERMS OF SECTION 40 (1) OF THE
OCCUPATIONAL HEALTH AND SAFETY ACT, 1993**

Under section 40 (3) (b) of the Occupational Health and Safety Act, 1993 (Act No. 85 of 1993), I, Faiza Salie, appointed as chief inspector in terms of section 27 (1) of the said Act, and by virtue of the power delegated to me by the Minister of Labour in terms of section 42 (1) of the Act, hereby grant exemption in terms of section 40 (1) to persons presently occupied with the activities described under regulation 11(2) of the Vessels under Pressure Regulations, 1996, published under Government Notice No. R. 1591 of 4 October 1996, from the obligation of being holders of a permit issued by the South African Bureau of Standards in terms of SABS 1475 for a period of twelve (12) months, from the date of the commencement of the said regulations: Provided that such persons submit a written application for the required permit to the South African Bureau of Standards within six (6) months from the date of this notice.

F. SALIE
Chief Inspector
